

Retail Sales Performance Dashboard

Week 5 Assignment

Step 1: Create new project

Step2: Enter project name and choose agile. Then click create

Create new project

Project name *

Retail Sales Performance Dashboard

Description

Visibility

Public

Anyone on the internet can view the project. Certain features like TFVC are not supported.

Private

Only people you give access to will be able to view this project.

^ Advanced

Version control ?

Git

Work item process ?

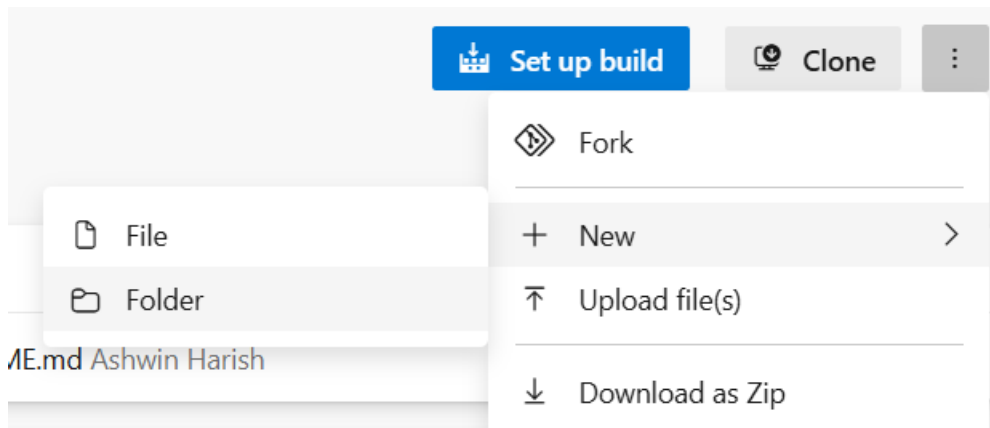

Agile

Cancel

Create

Step 3: Click Repo -> Files -> Initialize. Then click New -> Folder

Step 4: Create new folder

New folder

New folder name

/ Retail Sales Performance Dashboard

Use slashes to create multiple subfolders like "sub/folder".

New file name

Readme.md

Git folders cannot be empty, so a placeholder file will be added. Its content can be edited before commit.

Cancel

Create

Readme.md file code

```
1 ### Capstone Tasks
2 - Create a pipeline that runs the full analysis weekly
3 - Output results to a CSV or log file-
4 Add a step to email or log top 5 lowest performing stores
5
6 ### Deliverables
7 - YAML pipeline file
8 - Output file showing key sales insights
9
```

Step 5: Now Upload ipynb file

Commit

Drag and drop files here or click browse

Browse...

Step 9: Choose Existing Azure Pipelines YAML File

Configure your pipeline

Starter pipeline

Start with a minimal pipeline that you can customize to build and deploy your code.

Existing Azure Pipelines YAML file

Select an Azure Pipelines YAML file in any branch of the repository.

Step 10: Choose path and click continue

Select an existing YAML file ✕

Select an Azure Pipelines YAML file in any branch of the repository.
